SUMMARY

A motivated and reliable Document Controller with proven expertise in document management systems, subcontractor invoice processing, project reporting, and data control within fast-paced construction environments. Experienced in handling technical submittals, material and subcontractor invoice approvals, and correspondence in collaboration with consultants and contractors. Skilled in designing document control systems and building web-based applications to simplify invoice tracking, in addition to supporting HR operations and managing official email correspondence. Strong knowledge of document control procedures, file organization, and workflow management, supported by a solid foundation in Software Engineering. Known for ensuring smooth information flow, timely reporting, and contributing to project success through effective documentation, systems development, and communication practices.

PROFESSIONAL EXPERIENCE

Document Controller - Subcontractor Invoicing, Systems & HR - Nam Arabia Co., Saudi Arabia

November 2025 - Present

- Handle and process all subcontractor invoices, ensuring accuracy, proper backup, and timely approval.
- Designed and developed the Subcontractor Payment Management System (SPMS) to control and track subcontractor invoices and payment status.
- Built a web-based application to record, organize, and manage subcontractor invoices digitally.
- Continued to design and refine internal document control systems to make document controller workflows faster and easier.
- Perform HR-related activities in support of site and office operations.
- Manage day-to-day email correspondence and coordination between site, consultants, and contractors.
- Assist with general administration activities in support of site and office operations.

Site Document Controller - Nam Arabia Co., Saudi Arabia

October 2024 - October 2025

- Managed and controlled all project documents, drawings, and invoices.
- Reviewed and verified submittals before sending to consultants.
- Designed and organized document control systems to make document control workflows easier and more efficient.
- Maintained organized document control and filing systems.
- Tracked revisions, approvals, and ensured latest versions were available on site.
- Prepared daily, weekly, and monthly project reports.
- Coordinated with consultants, contractors, and site teams.
- Supported audits and ensured compliance with documentation standards.

Document Controller - Silver Contracting Co., Pakistan

2019 - 2024

- Maintained and updated records for material delivery notes, requests, and approvals.
- Managed warehouse and site documentation, including material receipts and issue logs.
- Organized and filed all project and inventory-related documents systematically.
- Tracked material movements and updated daily and weekly stock reports.
- Coordinated with storekeepers and engineers for documentation accuracy.
- Ensured proper labeling, numbering, and archiving of records for easy retrieval.
- Supported audits and assisted management in preparing material documentation.

Team Leader - Riphah University, Pakistan

2021 - 2024

- Organized academic and technical documents.
- Supported data entry and digital record management.
- Worked as a team member in university workshops and projects.
- Assisted faculty in IT and documentation tasks.
- Prepared reports and maintained accurate records.

RESEARCH

Final Year Research Project: Donation App

Developed an Android-based donation application that integrates multiple charitable organizations into a single platform. The project focused on improving accessibility, transparency, and efficiency in the donation process through a user-friendly mobile interface.

TECHNICAL & EDUCATIONAL SKILLS

- **Document Control Systems:** Proficient in managing project documents, submittals, subcontractor invoices, and reports using structured control systems.
- **Systems & App Development:** Designed a Subcontractor Payment Management System (SPMS) and a web-based application for subcontractor invoice records.
- **Software Tools:** MS Office (Word, Excel, PowerPoint, Outlook), Adobe Acrobat, SharePoint, and Google Workspace.
- **Data Management:** Skilled in maintaining digital records, logs, and tracking revisions and approvals.
- **Reporting & Analytics:** Creating daily, weekly, and monthly progress and status reports.
- **Database Handling:** Basic knowledge of SQL, MS Access, and data storage systems.
- **Programming & Development:** Familiar with Java, Android Studio, and web-based application development.
- **HR & Administration:** Performing HR-related activities, assisting with general administration, and managing email correspondence and coordination.
- **System Troubleshooting:** Supporting IT-related tasks such as file recovery, software installation, and data backup.
- **File Management:** Expertise in organizing, naming, and archiving technical and administrative documents.

ACHIEVEMENTS

- Designed and developed the Subcontractor Payment Management System (SPMS) and a web-based application for subcontractor invoice tracking.
- Streamlined document control and reporting systems to improve accuracy and workflow efficiency.
- Successfully maintained complete and organized project records across multiple sites.
- Contributed to timely submission of reports, WIRs, and material submittals for consultant approval.
- Recognized for reliability, attention to detail, and effective coordination within project teams.
- Supported digital documentation improvements using technical and software knowledge, while also handling HR activities and email correspondence.
